

Vertical lines set arbitrarily at 3 and 4 meters. Horizontal lines for chlorophyll graph set at the proposed 10 ug/L advisory and 20 ug/L action levels. Horizontal lines for TP arbitrarily set at 25 and 75 ug/L. Diamonds represent drinking water reservoirs. Open circles represent all plains reservoirs between 20 and 2000 acres.

Vertical lines are set at the proposed Flushing Index cut-points for all plains reservoirs (see proposed matrix). Horizontal lines for chlorophyll graph set at the proposed 10 ug/L advisory and 20 ug/L action levels. Horizontal lines for TP arbitrarily set at 25 and 75 ug/L. Diamonds represent drinking water reservoirs. Open circles represent all plains reservoirs between 20 and 2000 acres.
